

# LED Whips Installation Instructions (RSQG5FT)

- Step 1:  
Prepare installation materials:
- 1x Fixing base
  - 2x Soft plastic tape
  - 2x Hex screws
  - 1x Turnscrew.

- Step 2:  
Wrap the tape around the tube.

- Step 3:  
Place the smaller half of the clamp  
onto one side of the tape.

- Step 4:  
Place the other half of the clamp  
on the tape, securing it in place.

- Step 5:  
Put the hex screw through the  
upper hole and tighten it down.

Step 6:

Repeat this process with the bottom hole.

Step 7:

Make sure everything fits straight and tight.

Step 8 - Base installation:

As shown in the picture, unscrew the hardware from the bottom of the base.

Step 9:

Thread the wire through the hole of base.

Step 10:

Thread the wire through the hardware, finishing with screwing and tightening down the nut.

Step 11:  
Pictured is what it should look like when the installation is finished.

Step 12:  
The red wire requires a 12v supply, while the metal casing of the base serves as the ground.
